

Group Assignment:

Market Entry into a New Region

GROUP PRESENTATION · APPROX. 30 MINUTES PER GROUP + Q&A · GROUPS OF 4–5 STUDENTS

Form **groups of 4–5 students**. Choose a multinational enterprise (MNE) that is entering — or is planning to enter — a market in **one** of the five regions below. You will analyse the opportunity from every angle and conclude with a recommended, well-justified market-entry option. Every group member presents a part.

Latin America

Middle East

Far East

Africa

Central- & Eastern
Europe

Pick a real MNE and a concrete target country within your region (e.g. a European retailer entering Brazil, a carmaker entering Saudi Arabia, a food brand entering Vietnam). The more specific the case, the stronger the analysis.

What to analyse — six required analyses

Analysis	What it should cover
1 · Industry analysis	Define the industry and its boundaries; size, growth and key trends in the target region; apply Porter's Five Forces to judge how attractive and contestable the industry is.
2 · Competitor analysis	Identify the main incumbents and other foreign entrants; compare their positioning, market share, strengths and strategies. Where and how can your MNE compete?
3 · Market-entry analysis	Assess the feasible entry modes — exporting, licensing / franchising, collaborative ventures, and wholly-owned subsidiary (greenfield vs. acquisition). Weigh control, risk, resource commitment and speed of entry.
4 · SWOT analysis	Match the MNE's internal strengths and weaknesses against the opportunities and threats of the target market. Keep every point specific and evidence-based.
5 · PESTEL analysis	Examine the P olitical, E conomic, S ocial, T echnological, E nvironmental and L egal factors shaping the macro-environment; highlight the factors most material to entry.
6 · Risk-management analysis (detailed)	Identify country, political, commercial, currency, operational and cultural risks; rate each by likelihood and impact ; propose concrete mitigation and contingency measures.
Decide & justify. On the basis of the six analyses, recommend one market-entry option and defend it: explain why it beats the alternatives given the industry, the competition, the macro-environment and the risks you identified.	

Deliverables, Submission & Marking

Deliverables

Deliverable	Details
Presentation slides	A slide deck (PDF or PowerPoint) presented live in approx. 30 minutes , plus Q&A. Follow the six-analysis structure and finish with your justified recommendation. Every group member presents. Presentations take place on Day 8 .
Excel sheet of sources	An Excel workbook listing all sources — one row per source, with the full reference, the link, and the analysis it supports. This is how we judge the credibility of your data, so be thorough.

Submission & deadline

One submission per group, uploaded to **Canvas** (slides + Excel sheet) by **Thursday, 16 July 2026, 23:59 (midnight)**.

Marking scheme

The group presentation counts for **45% of the course grade** and is marked as follows:

Criterion	What we assess	Weight
Industry & competitor analysis	Industry structure & Five Forces; key rivals and their positioning	15%
PESTEL & SWOT analysis	Macro-environment; strengths / weaknesses vs. opportunities / threats	15%
Market-entry analysis & recommendation	Entry-mode options and a clearly justified, well-argued choice	25%
Risk-management analysis	Identification, assessment and mitigation of the key risks	20%
Sources & Excel documentation	Quality, credibility and complete referencing of all data	10%
Presentation & teamwork	Structure, clarity, timing (~30 min), delivery and balanced participation	15%
Total		100%

Tips: cite your sources on the slides · build on recent, credible data (UNCTAD, World Bank, IMF, national statistics offices, company annual reports) · roughly 15–20 slides works well for 30 minutes · agree early who presents what · rehearse to hit the timing · state clearly how you used any AI tools.
