

Group Assignment:

Theories of International Trade and Investment

GROUP PRESENTATION · APPROX. 10 MINUTES PER GROUP + SHORT Q&A

Each group is assigned **one** of the eight theories covered in the session on theories of international trade and investment. The allocation is numbered: **Theory 1 is introduced by Group 1, Theory 2 by Group 2**, and so on (see the table below). Prepare a short presentation of approximately **10 minutes**; every group member presents a part.

Your presentation must cover four elements:

- 1 Explain the theory.** Who developed it, and when? What is the core argument? What question about FDI / internationalization does it answer?
- 2 Find a real-world example.** Search for a company case that illustrates the theory — *not* the example used in the lecture — and show briefly how the facts fit the theory.
- 3 Find one academic journal article** that uses, tests or extends the theory (for example from the *Journal of International Business Studies*, *Journal of World Business* or *Management International Review*). Introduce it briefly: research question, method, key finding.
- 4 Discuss pros, cons and limitations.** What does the theory explain well? What does it miss? Which other theory covers its blind spots?

Who presents which theory?

Theory	Group	Topic	Landmark reference(s) — your starting point
Theory 1	Group 1	Hymer's monopolistic advantage theory	Hymer (1960/1976); Kindleberger (1969)
Theory 2	Group 2	Internalization theory	Buckley & Casson (1976); Coase (1937)
Theory 3	Group 3	Location theory of FDI	Dunning (1993) — the four FDI motives
Theory 4	Group 4	Vernon's product life cycle theory	Vernon (1966, QJE; revised 1979)
Theory 5	Group 5	Dunning's eclectic paradigm (OLI)	Dunning (1977, 1980, 1988, 2000)
Theory 6	Group 6	Behavioral theory of FDI	Aharoni (1966)
Theory 7	Group 7	Uppsala model of internationalization	Johanson & Vahlne (1977; revised 2009)
Theory 8	Group 8	Resource-based approaches	Penrose (1959); Wernerfelt (1984); Barney (1991)

The landmark references are a starting point, not the required journal article — find a further academic article that applies or tests the theory. The lecture slides give you the structure; your example must be a new one.

Tips: cite your sources on the slides · roughly 6–8 slides is plenty · finish with one discussion question for the class.
